The Institute of
Chartered Accountants
in Australia

About the Institute

The Institute of Chartered Accountants in Australia (the Institute) is the professional body representing Chartered Accountants in Australia. Our reach extends to more than 60,000 of today's and tomorrow's business leaders, representing more than 51,000 Chartered Accountants and 12,000 of Australia's best accounting graduates currently enrolled in our world-class Chartered Accountants postgraduate program.

Our members work in diverse roles across commerce and industry, academia, government and public practice throughout Australia and in 114 countries around the world.

We aim to lead the profession by delivering visionary leadership projects, setting the benchmark for the highest ethical, professional and educational standards, and enhancing and promoting the Chartered Accountants brand. We also represent the interests of members to government, industry, academia and the general public by actively engaging our membership and local and international bodies on public policy, government legislation and regulatory issues.

The Institute can leverage advantages for its members as a founding member of the Global Accounting Alliance (GAA), an international accounting coalition formed by the world's premier accounting bodies. With a membership of around 775,000, the GAA promotes quality professional services, shares information, and collaborates on international accounting issues.

Established in 1928, the Institute is constituted by Royal Charter. For further information about the Institute, visit charteredaccountants.com.au

President's message

the view from the top

The last 12 months have presented an incredible challenge for the global economy. Business needs strong leadership now more than ever – and that's where Chartered Accountants come in. Here and overseas, our members have played an integral role in guiding their clients, businesses and employers through the downturn.

The Institute has been helping members in this task by providing a range of resources, such as a suite of factsheets that tackle some of the key issues for businesses today. Practical support like this will continue into the new financial year, and can be found at www.economyinfoocus.com

The global financial situation has also brought challenges for the wider accounting profession itself. The last year has been all about reacting to those issues while keeping an eye on the long term.

First, let's look at the issues that have arisen in the wake of the economic downturn.

Financial statements are now being questioned like never before. We have a set of 'international' accounting standards (IFRS) which have not been adopted by all the major markets (the US being a notable absentee). Meanwhile, due to an increased focus on domestic affairs, some of the markets that have signed up to IFRS are beginning to question their position.

Are we, as a global community, still committed to IFRS? I think we should be. Globalisation cannot be reversed, so it's important we don't go backwards ourselves. My hope and expectation is that the US will opt in to IFRS, but the process may be more prolonged now.

In the wake of the financial downturn, the complexity of IFRS has also been under the spotlight. While we have greater disclosure, it is harder for shareholders, and others, to understand financial statements and value assets and liabilities. Increasingly, they are turning to analyst presentation packs to make sense of it all.

Understandably, a great deal of energy is expended on producing these packs – and shareholders are making major decisions based on them.

The problem is: analyst presentation packs are not audited.

In the short term, I would like to see the analyst presentation packs issue addressed by the domestic and international accounting standards boards. In the medium term, the focus needs to be on the relevance of the financial statements themselves.

These challenges have been raised, or exacerbated, by the economic downturn, but there are a number of others that exist regardless. As Chartered Accountants of today, we must take a lead on these issues, because they will shape the profession of tomorrow.

“The global financial situation has also brought challenges for the wider accounting profession itself. The last year has been all about reacting to those issues while keeping an eye on the long term.”

Take non-financial reporting, for example. We've almost reached the tipping point where this is as important as the financial statements. Shareholders are more and more interested in how a company is performing in areas such as sustainability.

This year, the Institute produced Broad Based Business Reporting guidance for not-for-profit entities and businesses (see page 16). The next focus must be to bring to life the requirements for disclosure of these non-financial measures, and then make it a requirement to have an appropriate level of sign-off from an auditor. We've made a good start,

actively lobbying government to ensure that the proposed Carbon Pollution Reduction Scheme includes such a requirement. Moving forward, we'll continue that approach in other areas of sustainability, such as water.

I am constantly impressed and encouraged by the calibre of Chartered Accountants who participate in boards, councils and committees both here and overseas.

Another issue we remain firmly committed to tackling is the skills shortage. While some businesses have been shedding staff during the recent economic downturn, long-term employment forecasts still predict that by around 2020 there will be more accountants retiring than there will be accountants entering the profession. The Institute is working relentlessly to try and curb this, with a strategy that encompasses engagement with students, schools and universities while talking to government about the increasing number of overseas students studying here and then disappearing back overseas.

On top of that, the scheme to attract non-accounting graduates into the Chartered Accountants Program – via a conversion course with Deakin University – is starting to bear fruit. In the last year, almost 100 graduates from the Deakin program have commenced the Chartered Accountants Program, and their results have matched that of their accounting graduate peers. I believe there is potential to establish similar schemes elsewhere in Australia, and that could have a significant impact long term.

So yes, there have been some notable achievements this year. But the hard work has really only just begun.

I'm confident that the Institute is up to the challenge. This year, the Board approved a range of cost-saving measures that saw us return a healthy surplus – which we need to ride out the economic downturn. The cost savings do not mark a major departure from our strategic thinking.

The Board and management simply took a look at the Institute (a mostly fixed-cost business) and asked if the emphasis of the strategy needed to be adjusted in light of the economic downturn. You can read more on this in the CEO's introduction on page six.

Speaking of the CEO, I'd like to thank Graham Meyer for the results he has delivered. In his three years to date, Graham has injected energy and openness into the organisation. Backed by outstanding staff and a capable management team, he's managed the balance sheet exceptionally well and steered the Institute into a position where we can face the uncertain economic environment with confidence.

First and foremost, the Institute is built on the foundation of its members. In this regard, too, I can report that the profession is in good hands. I am constantly impressed and encouraged by the calibre of Chartered Accountants who participate in boards, councils and committees both here and overseas. I would like to thank each and every member who has helped the profession rise to the challenges of the last year. I am relishing the prospect of what lies ahead.

Richard Deutsch
President

beyondblue

The Board takes a holistic approach to its work on behalf of members. Recent research shows that the accounting profession is fourth highest in terms of risk factors for depression in Australia (behind lawyers, doctors and dentists). With the help of the Victorian Regional Council, we have established a partnership with beyondblue which, in the coming months and years, will help raise awareness about depression and anxiety in the accounting sector and reduce the associated stigma. Armed with the facts, Australia's accounting workplaces will be better equipped to recognise the early warning signs and to assist colleagues to seek support or professional help.

CEO's message

from the inside out

Like most businesses, one thing dominated our agenda this year: the economic slowdown. We took a series of measured steps to address its impact while ensuring that we continued to deliver on our mandate to support members and lead the accounting profession.

It's very important that, over a three-year period, we generate cash so that we can meet the needs of our membership. Ironically, to generate *positive* cash flows we started by speculating about *negative* scenarios. We considered the impact of potential downturns in student numbers, membership renewals, training revenue and sponsorship revenue.

This modelling told us that we would need to batten down the hatches. But before we decided on any change, we committed to three guiding principles:

1. Members and candidates would not see a difference in quality of service, products or benefits
2. Staff would continue to feel that they were valued
3. Nothing must adversely affect the long-term viability of the Institute.

From there, we agreed on a series of measures to see us through. Firstly, we went through our expenses in great detail. No stone was left unturned as we tightened up supplier contracts and asked all our staff to focus on the total cost of buying goods and services.

Next, we took a careful look at our organisational structure to ensure we had the right combination to deliver our strategy. This led us to a more streamlined structure, shifting from nine divisions down to six, with a clear focus on accountability.

These measures delivered significant savings that are already flowing into our bottom line.

In a normal year, we would aim to deliver a surplus of approximately 2.5% of revenue, and a return on member

funds of 6 – 7%. The above activities have helped us exceed those targets this year – and we hope to do so next year as well.

This resulting surplus will not only help us ride out the economic storm. It also puts us in a position to invest in some key strategic areas: leadership work with academia and universities, support for members working in the corporate sector, and support for members working in regional and rural Australia.

“We agreed on a series of measured steps to see us through the economic downturn, while continuing to support members and lead the accounting profession.”

Equally importantly, we now have capital that could be invested in a much-needed overhaul of our IT systems. The scale of this issue cannot be underestimated. Our current systems and structures are not only inflexible but outdated. Left untouched, they will seriously undermine our ongoing ability to deliver relevant, timely and high-quality services for members.

Going forward, we have proposed a two-year strategy to overhaul our computer systems, which requires a significant investment. This would allow us to communicate better with members (by upgrading our current customer database) and customise products and services (our website being an obvious example) to make them as relevant as possible for members.

Clearly, a lot of this year has focused on getting our own numbers right, and lining up our strategic plan to reflect member needs. But there have been some impressive, more externally focused results this year too.

Cognisant of the increasing engagement between Australia and the Asia-Pacific region, we embarked on a strategy to help build the exposure and influence of Australian Chartered Accountants within Asia.

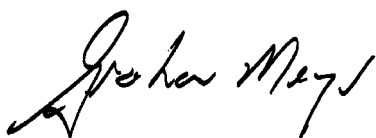

Many Asian countries want to enhance their accounting and auditing standards but lack the resources to do so. The Institute is equipped with the core expertise (namely education and training) to help fill that gap.

We have, for example, established mutually beneficial relationships in Malaysia. An arrangement with the Malaysian Institute of Certified Public Accountants has been put in place to facilitate offering the Chartered Accountants Program in Malaysia. This will open the door for successful graduates to work as Chartered Accountants in Australia. Meanwhile, our *Audit Manual* has been customised for the Malaysian Institute of Accountants. Similar arrangements in other Asian countries are on our agenda.

Another remarkable achievement this year was the continued expansion of our Live Online Training. From their desktops, members can participate in a training session from any broadband internet connection in the world. A virtual training room gives members the chance to ask questions throughout the session, share ideas and communicate directly with the presenter and other delegates.

The feedback from members has been overwhelmingly positive (particularly in regional and rural areas). Since launching in August, we have run more than 80 Live Online Training sessions, attracting more than 3500 delegates. To meet demand, we will extend this service further in 2009 – 2010.

It's been a challenging – and highly productive – year. We have a lot to be proud of. Even if the economy deteriorates more than we expect, the Institute will remain extremely viable. This is testament to the vision of our Board, to the leadership of our management team and to the determination of our staff. I'd like to thank them all. With their combined expertise, members can be confident that the Institute is equipped to prosper into 2009 – 2010 and beyond.

Graham Meyer
CEO

Other milestones in 2008 – 2009

- > Module enrolments in the Chartered Accountants Program broke the 19,000 mark, cementing our position as the pre-eminent pathway for graduates and practitioners to enter the profession. Read more on page 18.
- > We secured substantial regulatory change for members through sustained lobbying activities. More than 170 submissions were made to government and other bodies. Read more on page 15.
- > Our biennial staff culture survey secured a 96% response rate. The results showed notable improvements since the last survey in 2006, and indicated that staff believe in the Institute's overall purpose and have a strong team ethic. This justifies all we have done to engender a proactive and supportive culture in recent years. Read more on page 24.
- > A total of 11 thought leadership papers were published, helping to shape the future of the accounting profession. Read more on page 16.
- > For the first time in our 81-year history, our total membership passed the 50,000 mark.

Through its leadership, the Institute enhances and promotes the reputation and role of Chartered Accountants, both individually and collectively, and ensures the highest professional quality of its current and future members, for the benefit of the business community and the public interest.

This is our core purpose.

Vision: leading the profession

The Institute of Chartered Accountants in Australia will be:

- > A visionary organisation with respected thought leadership and key business partnerships
- > Setting the benchmark for the highest ethical and educational standards
- > Providing a Chartered Accountants brand which is the passport for lifelong career success
- > Representing and leading the members nationally and influencing regionally and globally.

Each year, in July and August, strategic thinking sessions are held with the Institute's regional councils and advisory committees. This provides input into the Board's own review of the strategic plan in October. Following that, a strategic thinking session takes place at each Board meeting during the year, focusing on one of the six strategic objectives in the plan. To review the strategic plan in detail, visit charteredaccountants.com.au/strategicplan
This is our process to develop the strategic plan.

Strategic plan 2009 – 2011

Strategic issues

- > Relevance to members and stakeholders
- > Leadership and competitive positioning of the Institute
- > Growth to ensure a sustainable future for the Institute and Chartered Accountants
- > Global positioning
- > Ensuring the Institute is fit for the future
- > People and culture.

P Play it straight **R** Respect builds success **I** Improve and innovate
D Deliver to win together **E** Expect the best.
These are our core values.

Stakeholder engagement

Rising to meet economic challenges and seizing the initiative to lead business through the financial turbulence.

This was the Institute in 2008 – 2009.

Comments

The member satisfaction rating is based on research conducted annually by an independent organisation. The 2009 member satisfaction rating has not changed beyond the +/-4% variance that is statistically significant. In order to improve member satisfaction, the Institute is undertaking a range of activities, as described further below.

Member attrition has increased slightly since last year, but this is more than offset by the increase in overall membership numbers to a record high for the Institute. The Institute will continue to monitor attrition rates closely, particularly during the global economic downturn.

Key activities

To ensure that it continues to meet the needs of members, the Institute undertook a review to clarify the value proposition for each member segment. Central to this was a series of in-depth research interviews with a cross-section of members.

The Institute interacts with members through events, conferences, roadshows, the web, print and broadcast media, e-newsletters, manuals, toolkits, guides, *Charter* magazine and training sessions.

During 2009, the Institute delivered some 700 workshops, forums, debates and other events on issues such as

superannuation, income tax, business valuations, legally enforceable auditing standards, and the future role of the CFO. Meanwhile, more than 4000 accounting and business professionals across all major capital cities attended the popular Business Forums.

This year the Institute, like many other professional bodies, did see a downturn in attendance figures brought on by the prevailing economic climate. However, the combination of quality content and speakers, together with a robust marketing strategy, contributed to the overall success of the Institute's conferences.

The Institute provides members with a range of ways to access training. A combination of face-to-face, in-house

and online delivery methods allows members to choose the delivery channel that suits them best. The Institute is committed to providing a comprehensive range of training for members.

Notable successes this year included major Audit Conferences in April (307 delegates attended in Sydney and 193 in Melbourne) and a suite of self-managed superannuation fund (SMSF) resources. This included an SMSF conference which was opened by Senator Nick Sherry and successful training activities on the audit of SMSFs and other technical superannuation issues.

In August, the Institute piloted a new way for members to access training online. Since then, more than 80 Live Online Training sessions have attracted delegates in droves, with an average of more than 40 delegates per session.

🔥 The popularity of Live Online Training has grown and grown. The first monthly online Tax Update in August 2008 attracted 20 delegates. It now it regularly attracts an average of 145. 🔥

The popularity of Live Online Training has grown and grown. The first monthly online Tax Update in August 2008 attracted 20 delegates. It now it regularly attracts an average of 145 delegates and continues to grow. Meanwhile, two complimentary trial sessions on standard business reporting (a government initiative to reduce the regulatory burden on business) secured 200 registrations within 15 minutes.

Publications

Members can choose from a range of regular Institute e-newsletters to best suit their individual circumstances. These e-newsletters focus on technical updates, tools, thought leadership and issues facing the accounting profession. Following readership surveys, several publications have been enhanced this year with improved formats and new features such as podcasts, polls and member interviews. A new e-newsletter, tailored to the needs of members in regional and rural Australia was also launched (for details, visit charteredaccountants.com.au/ebulletin).

Charter, the Institute's monthly magazine, is circulated to more than 50,000 recipients. The magazine's quality, credibility and targeted reach also make it attractive to advertisers and, while the economic downturn has impacted advertising revenues, the Institute is pleased with its ability to maintain its advertising contracts. Read the magazine at www.chartermagazine.com.au

Products and services review

During the year, the Institute reviewed the products and services delivered through the Member Benefits Program. This included:

- > A thorough examination of the performance of the products, based on value and/or volume of sales
- > The fit with the Institute's overall strategy and direction
- > Feedback from members, including the annual member survey.

The results indicated that the focus should be on the development of products, services and partner alliances that capitalise on the core technical competencies of members, and that new personal offerings around work/life balance should be limited. In response to this, the Institute formed a business partnership with Thomson Reuters to provide content for the tax training program and to publish a hard-copy version of the *Australian Auditing Manual* for the academic market. Since it launched in July 2008, the Institute's online *Australian Auditing Manual* has been downloaded more than 1200 times. Meanwhile, the supplementary *Australian Auditing Toolkit* has enjoyed sales of more than 500 this year. For details, visit charteredaccountants.com.au/auditmanual

As the economic downturn took hold, the Institute provided a range of support for members. This included the launch of a dedicated global economic downturn resource website (economyinfocus.com), as well as fortnightly technical factsheets distributed via the *eBulletin* e-newsletter. Meanwhile, the Institute's 'Managing Your Personal and Professional Risk' campaign reminded members of the ING and HCF insurance offers that the Institute had negotiated for members.

Academic partnerships

The Institute has a mutually beneficial relationship with the university sector and is now a platinum sponsor of the Accounting and Finance Association of Australia and New Zealand. This support not only provides essential funds for the accounting and finance academics' annual conference; it also awards PhD scholarships to give impetus to successful academic careers. The Institute and its members have also provided significant input into university projects that aim to improve the relevance of undergraduate accounting degrees. In addition, the Institute has funded academic research in the accounting and finance sector.

Leadership and competitive positioning

there is no second best

Objectives

- > A focused leadership strategy which ensures influence nationally, regionally and internationally
- > Effective, visionary and well-publicised thought leadership initiatives which profoundly and positively impact business and the accounting profession
- > A well-recognised and differentiated Chartered Accountants brand
- > Continuing regard for high standards of discipline, ethics and conduct in the profession.

Measurement

Overall performance	score out of 10	Providing leadership	score out of 10	Quality reviews	
2009	6.52	2009	6.78	Professional conduct investigations	290
2008	6.51	2008	6.83	Professional conduct tribunals	13

Comments

Over the past two years, the Institute has participated in the Annual Business and Professions Survey, conducted by Beaton Consulting, which measures performance and provides a ranking against other professional bodies. The Institute's overall performance increased from 2008 and the Institute was ranked sixteenth out of the 21 associations benchmarked. The median score for overall performance for all organisations was 6.89 out of 10. The Institute continues to focus on improving its overall performance, as described further in this section.

The Institute's score in providing leadership in the field was higher than the mean score of 6.66, ranking it seventh out of its benchmarking group of 21 professional bodies. An increased focus on thought leadership and government relations is intended to build on these scores in the years ahead.

Brand positioning

The Institute also undertakes independent tracking research to measure brand performance, but this is not being disclosed because this is commercially sensitive information.

Professional conduct tribunals

This year, the Institute began investigating 290 formal complaints (or other conduct issues involving members, such as regulator or court action). The investigations led to 13 members being called to appear before the Professional Conduct Tribunal. The numbers of investigations rose from 259 the previous year (although down from 317 in 2006 – 2007). The number of tribunal cases varies each year because of the timing of individual hearings, but has averaged around 20 cases annually over the last five years.

These incidence of conduct issues is very small, given that the Institute's membership exceeds 50,000, and given the huge number of engagements and tasks undertaken each year by Chartered Accountants on behalf of their clients and employers. Where the tribunal finds a case established against a member, a report is published in the Institute's monthly magazine and website. The member's name is stated, regardless of the severity of the sanctions imposed.

As well as being a mark of the transparency of the Professional Conduct function, these reports serve as a warning to other members about the importance of complying with both the letter and spirit of the Institute's standards, including the *Code of Ethics*.

Key activities

Competitive positioning

The Institute continues to promote and position the Chartered Accountants brand as the pre-eminent professional accounting qualification and helps attract young people to the profession. Together, the 'Riddle' television campaign and the online Student Challenge generated awareness and preference in target markets, such as university students. More details about competitive positioning in the student market can be read on page 18.

This year also saw a focus on the business community, with an extensive advertising campaign entitled 'The spirit of being number one'. The message that Chartered Accountants are the pinnacle of the accounting profession was displayed in outdoor, press and print advertisements. The advertising expressed the sentiment that the spirit of a Chartered Accountant is the spirit of 'no second best', and that Chartered Accountants are the kind of people who take on the biggest challenges to achieve the highest rewards, and promoted the benefits of using the services of Chartered Accountants. For details, visit charteredaccountants.com.au/spirit

Influencing government

The Institute advocates public policy that is not only in the interests of members and the accounting profession, but also in the national interest.

Leadership activities are designed to increase influence with government and regulators and position Chartered Accountants as leaders in the profession and the wider business community. By partnering with key stakeholders in public practice, the corporate world and academia on joint activities, the Institute builds relationships and enhances its leadership position.

The government has started several major policy reviews which are still ongoing. Some of these, such as the proposed Carbon Pollution Reduction Scheme and the Review of Australia's Future Tax System, have major potential economic impacts. The Institute has been actively involved in these reviews and many others, including:

- > The governance of SMSFs
- > The disclosure regime for not-for-profit organisations
- > The Bradley Review of Australian Higher Education
- > The development of anti-money laundering legislation
- > The Wallace Enquiry into a broad range of superannuation issues.

Submissions to government

Throughout the year, the Institute closely monitored and influenced regulatory change that may affect the accounting profession. More than 170 submissions were lodged with regulators and standards setters, on everything from audit and superannuation to reporting and taxation.

In the area of standard business reporting, the Institute played a leading role on the issue of streamlining business-to-government reporting, providing input to government on this process and enabling direct member involvement.

Meanwhile, the Institute lodged two submissions to the Review of Australia's Future Tax System, the first being developed with KPMG. The Institute also produced reports for government in the areas of the proposed Carbon Pollution Reduction Scheme and entity flow-through taxation for small and medium-sized businesses (the latter in collaboration with Deloitte).

And when the federal budget comes round, the Institute is always at the front of the pack. Following pre-budget submissions to government, the Institute's representatives followed up by attending the budget lockup in Canberra and conducting media interviews. So, shortly afterwards, when the government decided to revise the policy on employee share schemes, the Institute was perfectly positioned to be a leading commentator and influencer on the issue.

Elsewhere, the Institute influenced the AUASB's *Guidance Statement GS 009 Auditing Self Managed Superannuation Funds* and had a say in many other issues, including *Optional CGT Roll Over for Complying Superannuation Funds* with Capital Losses, the Australian retirement income system, facilitating online financial services disclosures, superannuation clearing house and lost accounts, as well as temporary residents and superannuation.

The Institute also worked alongside the other professional accounting bodies on leadership activities, such as developing an overarching financial advisory services framework. In recent years the Institute has been very vocal in advocating a fee-for-service approach in the financial advisory services industry to improve transparency for clients. Although this stance was initially unpopular with many, opinion has started to sway. The Institute's persistence is paying off.

Leadership and competitive positioning (continued)

Thought leadership

The Institute developed a Broad Based Business Reporting paper in conjunction with an advisory panel from KPMG, PwC, Regnan and the Australasian Investor Relations Association. The paper promotes a mechanism for businesses to better meet the information needs of key stakeholders and is designed to stimulate awareness and discussion. Broad Based Business Reporting was the theme of the 2009 Business Leader Series (see below), and the advisory panel also discussed the topic at the 2009 Chartered Accountants Business Forum.

The principles of Broad Based Business Reporting also flowed through into the revisions and updates of the Institute's not-for-profit annual and financial reporting paper. This paper was then used as a framework for the judging of the Institute-sponsored PwC Transparency Awards.

Leadership activities increase influence with government and regulators and position Chartered Accountants as leaders in the profession and the wider business community.

Climate change was very much on the thought leadership agenda this year. The Institute published a paper (prepared by Professor Roger Simnett from UNSW) entitled *The Benefits of Assuring Carbon Emissions* and has been working closely with the Department of Climate Change regarding the need for mandatory assurance of emissions reports (in accordance with the Auditing and Assurance Standards Board (AUASB) Assurance Framework). The Institute has also made submissions to the government on the proposed Carbon Pollution Reduction Scheme regarding tax, reporting and assurance aspects.

Making a noise in the media

Many of these positive leadership results were assisted by sustained media campaigns. This year, a strategic focus on leadership positioning resulted in a higher level of media coverage on key issues in target media (eg. 20% of all media coverage was secured in the *Australian Financial Review*). The Institute's proactive media strategy for the federal budget and ensuing issues secured 80 appearances in the media. Meanwhile, proactive media activity on the proposed Carbon Pollution Reduction Scheme, Broad Based Business Reporting, Review of Australia's Future Tax System and governance of SMSFs reaped 76 appearances in the media. The long shelf life of the previous years' leadership topics also helped to sustain media interest (in areas such as reinventing financial planning, tax treatment of carbon emissions, the future role of the CFO and tax entity flowthrough for SMEs).

Business Leader Series

This year, the Institute launched its Business Leader Series (along with a video-based website, www.business-leader.tv), aligning leadership topics such as Broad Based Business Reporting with the Business Leader Awards to create an ongoing program of activity.

In March, the Institute announced Origin Energy Managing Director Grant King as the 2009 Chartered Accountants Business Leader of the Year. The accolade for the Most Outstanding Chartered Accountant in Business went to Tom Pockett, Finance Director of Woolworths Ltd.

Now in their tenth year, the awards attract nominees representing a wealth of business talent in Australia, who are judged on their ability to demonstrate visionary leadership, exhibit best practice, show innovation, take risks, foster positive employee relations and contribute to the community.

Professional conduct

To regulate and govern the work of Chartered Accountants, the Institute works closely with other bodies, such as the Financial Reporting Council, the Australian Securities & Investments Commission (ASIC) and the Companies Auditors and Liquidators Disciplinary Board. This year, the Institute raised awareness of professional conduct activities by speaking at a meeting of the Accounting Professional and Ethical Standards Board (APESB), helping the Insolvency Practitioners Association of Australia to develop its disciplinary process, and initiating a dialogue with the NSW Law Society on the interaction between legal ethics and accounting ethics.

The Institute has published full details of its professional conduct findings and activities in these areas in the *2009 Professional Conduct Annual Report*, available online at charteredaccountants.com.au/professional_conduct/annual_reports

Quality review

The Institute's Quality Review Program assesses whether members in practice have the appropriate quality control policies and procedures in place to ensure that their work complies with professional standards and regulatory requirements.

This year, the *Quality Control Guide* was updated to help members in practices meet the quality control standards in *APES 320: Quality Control for Firms*.

The Institute also released practical guidance to address the significant issues and areas that preparers, audit committees and auditors need to consider when undertaking their professional responsibilities for the 30 June 2009 financial year-end. This highlighted three issues of particular relevance which require the exercise of significant professional judgement: going concern, asset impairment and fair values.

The Institute has published full details of its quality review findings and activities in the *Annual Report on the Quality Review Program* for the year ended 30 June 2009, available online at charteredaccountants.com.au/qualityreview

The year in review

Growth to ensure a sustainable future

strength in numbers

Objectives

- > Ongoing review of the Chartered Accountants Program to ensure relevance and pre-eminence
- > Innovative and influential careers marketing to ensure the attractiveness of a professional career in Chartered Accounting
- > Ongoing brand promotion to attract new members
- > Ensuring ongoing recruitment, development and retention of members.

Measurement

Candidate satisfaction

Employer satisfaction

Net member growth

Comments

Candidate satisfaction has shown a steady increase since 2007 and, though it dropped 4% in 2009, remains within the standard variance range of +/-4%. In response to the decline in candidate satisfaction with communication, the Institute is working closely with a communications specialist to ensure this result turns around in future. Employer satisfaction decreased 4% from 2008 after increasing 5% from 2007. We have since made changes to provide greater choice and flexibility for employers.

Net member growth is a pleasing result for 2009. It includes growth in affiliate members (partners in chartered firms who are not Chartered Accountants) and throughput from increased enrolments in the Chartered Accountants Program.

The Institute also measures and reports to the Board on initial and continuing enrolments in the Chartered Accountants Program and conversion to membership, but this is not disclosed in this report as it is commercially sensitive information.

Key activities

The Institute conducts a range of marketing activities that promote careers in Chartered Accounting, to attract quality recruits into the profession. The results this year were impressive.

Total student registrations through the Institute's student website (charteredaccountants.com.au/students) grew significantly, while record attendances were achieved nationwide at graduate employment evenings.

Academics are significant stakeholders for the Institute and so a series of vodcasts (online video clips) for teaching purposes was developed. The vodcasts were available on USBs and were well received by key academics.

The student section of the Institute website was enhanced this year with Chartered Accountant profiles, vodcasts and a student quiz. There are plans to improve interactivity even further next year.

Reaching non-accounting graduates

The Institute believes the Chartered Accountant qualification should be available to all high-achieving graduates who wish to qualify as accountants, rather than being limited only to high-achieving accounting graduates. To this end, the Institute has continued to broaden the pathways into the profession to allow non-accounting graduates to qualify for the Chartered Accountants Program. This represents a

significant step forward for the profession in Australia and is in alignment with global best practice.

The Institute has partnered with Deakin University to offer the Graduate Certificate of Chartered Accounting Foundations (GCCAF) course, which meets all the academic entry requirements of the Institute. The results from current GCCAF graduates match those of their accounting graduate peers.

Reaching international graduates

The Institute, with the other professional accounting bodies, was commissioned by the federal government to design a training program to support international graduates in transitioning to the Australian workforce.

To date, the joint accounting bodies have approved 12 training providers nationally to deliver the Skilled Migration Internship Program – Accounting (SMIPA) to international accounting graduates across all states, and 349 graduates have commenced an approved SMIPA program.

Greater flexibility for employers

To assist candidates and firms in the current economic environment, the 26-week entry requirements for candidates already in employment was suspended for a 12-month trial from May 2009 to June 2010. This provides greater choice and flexibility for employers to determine when new employees are ready to commence the Chartered Accountants Program.

Candidates still need to meet the academic entry requirements of the Chartered Accountants Program, and must still accrue three years of full-time mentored service and achieve all required practical experience competencies before being admitted to membership of the Institute.

Postgraduate credits

Unique among professional accounting bodies, the Institute is an accredited higher education provider. This means the Chartered Accountants Program earns candidates a Graduate Diploma of Chartered Accounting, a qualification that can be used to gain credits to masters degrees offered by universities around Australia.

Research has found that many members intend to undertake postgraduate study, so this year CA Plus Pathways was launched. This offers Chartered Accountants Program graduates credits into postgraduate courses in streamed study areas of relevance to members – finance, financial planning, taxation and MBA.

In collaboration with universities across Australia, the Institute has negotiated subject credits for qualified Chartered Accountants to undertake a Graduate Diploma

or Masters in Business Administration, Taxation, Financial Planning and/or Finance. Some universities have agreed to offer credits for up to half the subjects required to complete the course, significantly accelerating course completion while saving members money.

Review of assessment framework

To ensure the ongoing rigour and relevance of the Chartered Accountants Program, the Institute's Education Board commissioned a review of the Program's assessment procedure.

The review was conducted by an external education expert and resulted in changes to the assessment framework of the Program, including improving security, removing complexity and streamlining assessment to address candidate workload. It also resulted in changes to assessment in the four technical modules of the Program.

📈 Net member growth of 5.7% is a pleasing result. It includes growth in affiliate members and throughput from increased enrolments in the Chartered Accountants Program. 📈

Candidates will now be able to direct their resources and time to the core assessment components and, with their employers, have more control in planning for the demands of postgraduate study.

Reviewing the technical modules

Following concerns about the level of difficulty and complexity in the Chartered Accountants Program, a comprehensive independent review was conducted. This included a review of the prerequisite knowledge assumed in the current modules and a gap analysis between this and the standard coverage at university. It also covered a review of the overall breadth and depth of content in the current modules and a report on topic coverage, overall quantum of knowledge with reference to the accepted level of learning hours in postgraduate courses, and comparison with the entry-level standard set by international peers. The outcomes of the review will be acted upon in 2010 to ensure the Chartered Accountants Program remains pre-eminent.

The year in review

Global positioning

地区领导地位

Objectives

- > Influencing the initiatives of the Global Accounting Alliance
- > Thinking globally and acting locally
- > Supporting the development of the profession globally
- > Ensuring participation in international forums is relevant and targeted
- > Broadening reach and influence in Asia to support development of the profession.

Measurement

No quantitative measures.

Comments

There are no quantitative measures for this strategic objective, but the Board makes an annual qualitative appraisal of the Institute's success in this area based on qualitative results throughout the year.

The Institute is dedicated to supporting the profession and increasing benefits to its members in Australia and globally. For example, the recent joint venture with the Malaysian Institute of Certified Public Accountants enables the Institute of Chartered Accountants in Australia to increase its profile and influence in the region while promoting high-level standards for education and continuous training across national borders.

Key activities

As a founding member of the Global Accounting Alliance (GAA), the Institute continues to work closely with other pre-eminent international professional accounting bodies to shape the profession globally.

Fourteen per cent of the Institute's members live overseas (spanning 114 countries, from Azerbaijan to Zimbabwe), and many of them can take advantage of the growing benefits that GAA membership offers.

A global passport

The GAA passport for member services has been well received around the world. The passport allows most of our 6982 members residing overseas in a GAA jurisdiction to gain access to most of the member services of the local institute.

International collaboration

This year, the GAA focused on breaking down barriers to international mobility for accountants and auditors; recognition of the differing needs between small and large entities; and an exhaustive range of other best practice and information-sharing issues. Meanwhile, the GAA underlined the importance of sustainability by joining the Prince of Wales' Accounting for Sustainability Forum. The forum

held an international symposium at St James's Palace in London to promote cooperation within the profession.

This year also saw the Japanese Institute of Certified Public Accountants secure membership of the GAA.

The GAA has provided a platform for the Institute to showcase some of the ways in which the Australian accounting profession is playing a leading role. This has included sharing best practice around Australia's liability capping schemes and the role of accountants in the financial planning industry.

“The Global Accounting Alliance has provided a platform for the Institute to showcase some of the ways in which the Australian accounting profession is playing a leading role.”

Also this year, following a thorough review of professional entry requirements and programs, GAA institutes agreed to recognise each other's continuing professional development compliance regimes, and a protocol has been developed so that joint submissions can be prepared on issues of common concern.

The *GAA Accounting Journal* was launched this year, bringing together articles of international interest from the member institutes' existing publications. Access to this online newsletter is free via www.gaaaccounting.com

About the Global Accounting Alliance

The GAA, formed in November 2005, is an alliance between:

- > Institute of Chartered Accountants in Australia
- > American Institute of Certified Public Accountants
- > Canadian Institute of Chartered Accountants
- > Hong Kong Institute of Certified Public Accountants
- > Institute of Chartered Accountants in England and Wales
- > Institute of Chartered Accountants in Ireland
- > Institute of Chartered Accountants of Scotland
- > New Zealand Institute of Chartered Accountants
- > South African Institute of Chartered Accountants
- > Japanese Institute of Certified Public Accountants.

Delivering the Chartered Accountants Program in Malaysia

The environment and platform for reporting is increasingly universal, and so the Institute's international collaboration extends beyond the GAA as well. In Asia, for example, it is important to encourage high levels of education and continuous training to help the profession meet the challenges of globalisation.

This year, the Institute reached an arrangement with the Malaysian Institute of Certified Public Accountants (MICPA) to facilitate delivery of the Chartered Accountants Program in Malaysia from September 2009.

The agreement aligns with the Institute's drive to engage with Asia, increasing global reach and influence. The agreement also enhances MICPA's brand positioning by offering the pre-eminent Chartered Accountant qualification in Malaysia in association with the Institute in Australia.

Upon completion of the Chartered Accountants Program via MICPA, candidates will be eligible to apply for membership with both the Malaysian and Australian institutes.

Ensuring the Institute is fit for the future

it all adds up

Objectives

- > A sound financial base to enable investment in key strategic issues
- > Appropriate infrastructure and processes to be responsive to member needs and promote sustainability
- > A nimble governance structure
- > Targeted and relevant committees providing quality input
- > Strategic thinking which identifies and responds to emerging trends and markets.

Measurement

Greenhouse gas emissions

2009	2,871 CO ₂ e tonnes
2008	2,839 CO ₂ e tonnes

(CO₂e = carbon dioxide equivalent)

CO₂e emissions in tonnes

Purchased electricity NSW	1940
Purchased electricity Vic	129
Purchased electricity Qld	128

The guiding premises for quantifying and reporting on carbon emissions were based on *The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard*, published by the World Resources Institute (WRI) and World Business Council for Sustainable Development (WBCSD).

Ratio of staff : members/candidates

2009	1 : 233
2008	1 : 213
2007	1 : 204

Revenue per member and candidate

Cost per member and candidate

Net profit

Comments

Greenhouse gas emissions cover use of electricity, water, paper and flights and were first measured by an external consultancy in 2008. This was followed up with a second report in 2009. Emissions this year increased by 1% compared to the previous financial year. The main cause of this was an increase in the commercial hiring of space in the Sydney head office to third parties (mainly for the staging of events). This caused an increase in electricity consumption, which therefore increased overall emissions.

The Institute achieved a surplus of \$4.8m for the year (in 2008 the surplus was \$1.8m).

Revenue increased by 5% while expenses increased by 1.3%. The main drivers behind the increased revenue were strong membership growth (5.7%) and a 19% increase in new student enrolments (other elements of Institute revenue reflected decreases or minor increases).

Key activities

Sound financial position in the economic downturn

In response to the global economic downturn, the Institute undertook a review of its business model. A thorough cost-saving initiative, coupled with an organisational restructure, has resulted in expenditure for the year being lower than originally anticipated.

The resulting surplus could enable the Institute to embark on much-needed IT system investment over the next two years (see below). Furthermore, should market-driven revenue such as training and development, advertising or sponsorship be adversely impacted in the year ahead, the Institute is in a much better financial position to continue to invest in key strategic initiatives.

For further details on the financial result, see page 38.

Transforming the Institute's IT systems

The Institute's IT systems are not just an internal issue that is 'behind the scenes'. From delivering events and education to e-commerce and accounts receivable, they affect almost everything the Institute does for members.

In 2008, consultants from Deloitte strongly recommended that the Institute replace its existing core technology (customer relationship management system and content management systems). The current systems are outdated, highly customised and difficult to upgrade.

↳ A thorough cost-saving initiative, coupled with an organisational restructure, has resulted in expenditure for the year being lower than originally anticipated. ↴

Replacing this technology would require significant investment, but would allow the Institute to deliver products and services in a far more flexible, convenient and relevant way for members. One of many notable improvements would be the Institute's website. This contains a wealth of information and resources for members, and replacing the technology that sits behind it would allow the Institute to tailor the website to individual member needs.

Furthermore, replacing the existing systems would deliver savings in the long term, making the Institute more efficient.

This year, the Institute started the journey to replace these systems by conducting a thorough review of potential solutions. Considering the level of investment required, this first step had to be rigorous and carefully thought out. By the end of 2009, the Institute will have the right platform to build from, making it possible for a computer systems replacement program to start in 2010.

Committee input

In 2009 a new Regional Australia Advisory Committee was established to provide input on issues affecting regional Australia, with a focus on policy formulation and thought leadership. As part of the development of the 2009 – 2011 strategic plan, a series of strategic thinking sessions was held with regional councils and board advisory committees across Australia. The focus was on the profession and the Institute in 2020. The outcomes of the sessions were provided to the Board as input to its strategic planning retreat in October.

The year in review

People and culture

every fraction is part of the whole

Objectives

- > A culture which is proactive, responsive and innovative, with strong leadership
- > Best practice in recruitment, retention and rewards
- > Rigorous succession planning, with high achievers identified and mentored
- > Key people recognised as experts in their fields.

Measurement

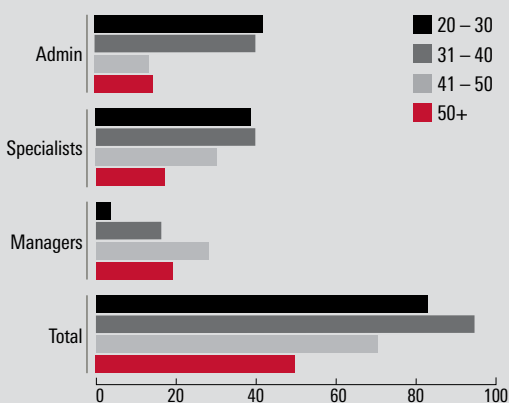

Employee satisfaction

Regretted employee turnover

Employees by age and role

Employees by gender and role

Comments

Employee satisfaction has increased over the past three years. This is measured through biennial culture and staff satisfaction surveys administered by independent agencies. Regretted employee turnover has declined over the past three years.

Key activities

In analysing the likely impact of the global economic downturn on the Institute, a number of decisions were taken to limit this impact. This included a range of cost-saving and process improvement measures, and the introduction of more flexible staffing arrangements to assist with an anticipated reduction in business activity. A change to the organisational structure was implemented in March to improve cross-unit cooperation and reduce the number of divisions in the Institute. This led to 23 positions being identified as redundant.

The Institute implemented best practice recommendations in managing the redundancy program, providing ongoing communication of business activities, counselling and outplacement for adversely affected staff, and a series of change management workshops for remaining staff. The guiding principles of the restructure were to:

- > Minimise the negative impact change can have on all staff
- > Ensure that service levels were maintained for members and candidates
- > Protect the long-term interest of the Institute.

A program of ongoing activity to support staff engagement/ re-engagement and process improvements was put in place to ensure that changes were sustainable.

A new human resources information system now provides online access to manager and employee information for all staff. This facility has dramatically reduced paperwork and reduced staff levels by allowing leave applications and payslips to be managed online.

The annual staff survey enjoyed a very positive response rate of 96% – a record for an Institute staff survey. Overall, the results were encouraging. As well as a strong teamwork ethic, strengths lie in the staff's belief in the Institute's overall purpose and values and the work it does. The results showed significant improvements since 2006 and helped identify areas of priority going forward.

📌 The annual staff survey enjoyed a very positive response rate of 96% – a record for an Institute staff survey – and the overall results were encouraging. 📌

Programs are already in place to address priority areas and will continue to be monitored over the next year.

This year, the staff rewards and recognition program was reviewed and refocused to provide one significant annual award to recognise outstanding performance and a 'thank you' scheme to promote cross-unit cooperation.

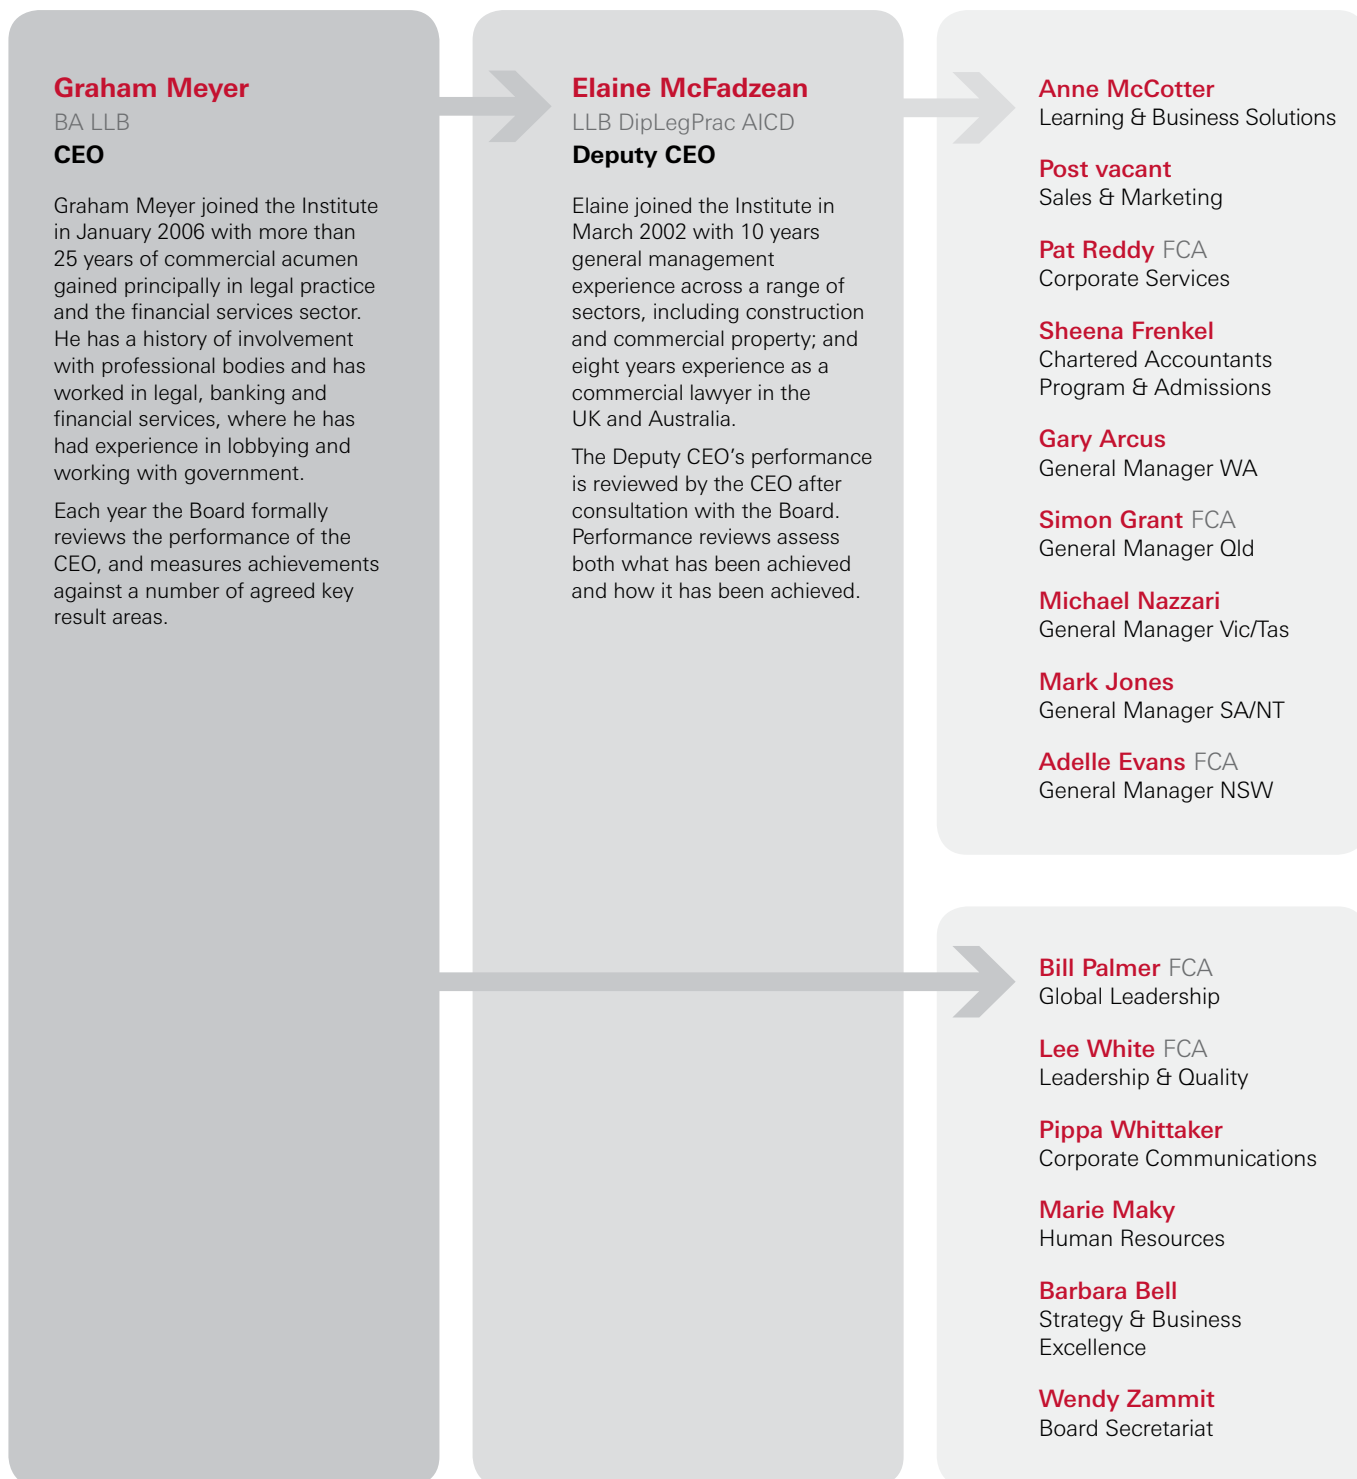

Meanwhile, staff participated in a number of internal and external training programs, with an average spend per staff member of \$1,100.

Everybody Counts

The Institute gives back to the community through its Everybody Counts program, partnering with organisations nationally and locally. Since the program commenced in 2006, staff have contributed more than \$70,000 to the nominated charity partners (Alzheimer's Australia, the Cancer Council, Camp Quality, the RSPCA, the Smith Family and Sane Australia), not to mention providing voluntary and pro bono assistance.

This year, the program was extended to include member firms, with LBW & Partners and Walker Wayland participating in pilots. It is hoped that more member firms will be involved in 2010.

Organisational chart

While not having the same level of structural complexity as listed companies, the Institute still leads by example in corporate governance. Its administration is based on rigorous systems of control and accountability.

This is how we check our numbers.

The Board

checking the numbers

President

Richard Deutsch FCA BEc

Richard is a partner of PricewaterhouseCoopers Australia and is the firm's national assurance leader. An APRA-approved auditor, he has more than 15 years' experience specialising in insurance and investment management. He is also the lead engagement partner on external audits for a number of major listed Australian companies, and provides due diligence support to clients looking at potential acquisitions in the insurance and investment management industry.

Richard was appointed a director in 2004 and is currently a member of the Nominations Committee, Joint Accounting Bodies (joint chair) and Executive Review Committee (chair). He was appointed deputy president on 1 January 2008 and then president on 1 January 2009.

Deputy President

Michael Spinks FCA

BCom (Acc) GDipAppFin F Fin

Michael is a principal at Collins SBA, specialising in business structures, superannuation, wealth management and financial planning. He has more than 15 years' experience in financial services, previously being a director of the financial planning group Garrisons. He has also served with the Royal Australian Navy, receiving an Active Service Medal for deployment in the Persian Gulf.

Michael was appointed a director in 2006 and is currently a member of the Nominations Committee, Joint Accounting Bodies, Executive Review Committee and Chartered Accountants Program Review Subcommittee (chair).

Rachel Grimes FCA BBus (Acc)

Rachel is a director in the Mergers and Acquisition Team at Westpac. She has 20 years' experience across the financial services sector, working in commerce with Westpac/BT Financial Group

for 11 years as well as in the Big 4 with Price Waterhouse.

Rachel was the state chairperson of the NSW regional council in 2004, and was appointed a director in 2006. She is chair of the Audit and Risk Committee and a member of the Joint Accounting Bodies, Executive Review Committee and the ICT Steering Committee.

Fiona Bennett FCA
BA (Hons) FAICD FAIM MIIA

Fiona is a business consultant and a director of a number of boards, including Alfred Health, WPC Group Limited, V/Line Passenger Corporation and the Legal Services Board (Victoria). She has more than 30 years' experience in commercial and financial management, governance, risk management and audit. She has held senior executive positions at BHP Billiton Limited and Coles Group Limited, and has previously been the chief financial officer of several organisations in the health sector.

Fiona was appointed a director in 2007, is currently a member of the Audit and Risk Committee, and monitors the activities of the Corporate Advisory Committee on behalf of the Board.

Peter Green PhD FCA FACS

Peter is a professor at the University of Queensland (UQ) Business School. He has spent 18 years as an academic, in the School of Accountancy at the Queensland University of Technology (QUT), the UQ Department of Commerce and now the UQ Business School. Prior to becoming an academic, he worked as the systems support manager for a major electricity board and as a management consultant.

Peter joined the Institute in 1997. He was state chair of the Queensland Regional Council in 2006. He was appointed a director in January 2009,

is currently a member of the Governance Committee, and monitors the activities of the Education Board on behalf of the Board.

Craig Farrow FCA
BEc DipFP CPMgr SA Fin FAICD

Craig is a partner in Brentnalls SA, Chartered Accountants and former national chair of the Brentnalls National Affiliation of Accounting Firms. His focus is on business advisory and board services, particularly in agribusiness and professional organisations. He is non-executive chair of M2 Telecommunications Group Limited (ASX, MTU) and Tonkin Consulting Engineers.

Craig is a fellow of the Governor's Leadership Foundation and was awarded the Institute of Chartered Accountants in Australia 1999 National President's Award for services to the Institute and the profession, as well as the 2006 South Australian Outstanding Service to the Profession Award. He was chair of the Institute's National Public Practice Committee for four years to the end of 2007, and was appointed a director in

2008. He is chair of the Governance Committee, a member of the ICT Steering Committee and a member of the Chartered Accountants Program Review Sub-committee.

Mel Ashton FCA
BCom FAICD

Mel is a business consultant and a director of Mentoring Services for Business. He is chair of a number of

ASX-listed companies and director of two large private companies.

Mel joined the Institute in 1984 and advanced to Fellowship in 1994. He has been a member of Western Australia Regional Council since 2001, served as vice chair in 2005 and was elected chair in 2006. He was appointed a director in January 2009, is currently a member of the Audit and Risk Committee, and monitors the activities of the Public Practice Advisory Committee on behalf of the Board.

Andrea Waters FCA

Andrea is a partner at KPMG Melbourne, specialising in audit.

She joined the Institute in 1987 and advanced to

Fellowship in 2008. She is a member of the Governance Committee and monitors the activities of the Audit Advisory Committee on behalf of the Board. She was appointed a director in January 2009.

Michael Watson FCA

Michael is an executive board member in the Australian National Audit Office. He jointly heads the audit

and assurance area in the ANAO. He has more than 35 years' experience specialising in public sector auditing, and has direct audit responsibilities for government business entities and major public sector entities.

Michael was an ACT regional councillor for six years and was chair for part of 2007. He is a member of the Audit and Risk Committee and was appointed a director in 2008.

The Board (continued)

The Board 2008

These members retired from the Board during this financial year.

Immediate Past President

Andrew Arkell FCA BCom GDipAppFin FAICD FCIS F Fin

Andrew is a business relationship manager assigned to the Global Real Estate business of QIC. Until recently, he was the company secretary and head of corporate & advisory services at QIC. Since

he joined QIC in 1994, Andrew's responsibilities have included financial control, tax, legal, company secretarial, risk management, investment compliance and facility services. He has worked across a number of segments, including the Big 4, small practice, government and in commerce with QIC.

Andrew was appointed a director in 2004 and was president from January to December 2008.

Derek Parkin FCA BCom CTA FAICD

Derek is a professor of accounting at the University of Notre Dame Australia, Fremantle. His professional career has spanned four continents during the past three

decades, beginning with Price Waterhouse in South Africa and moving to roles as partner at both Arthur Andersen and Ernst & Young in Australia. His current corporate roles involve both board and audit committee positions in the resources, shipbuilding and building products sectors.

A past state chair for the Western Australian Council, Derek served on council for 12 years. He was appointed a director in 2003 and retired as a director in December 2008.

Margaret Parker FCA BEc GDip (Acc) FTIA

Margaret resigned as a partner of Hayes Knight Melbourne on 31 December 2008, after serving as a partner for 13 years specialising in tax and business services

for medium enterprises and high net worth individuals. She has extensive experience in people management, business and finance, and serves as a director for Chunky Move Contemporary Dance Company, the Jean Hailes Foundation and Storage & Warehousing Services.

A past Victorian state chair, Margaret became a director in 2005 and retired as a director in December 2008.

Corporate governance

Governance/corporate governance statement

checking the numbers

The Institute of Chartered Accountants in Australia is a leading advocate of high standards of corporate governance. It is committed to best practice through its representation on the Australian Stock Exchange Corporate Governance Council and its efforts to adhere to the highest standards in regulating its own affairs and complying with relevant Commonwealth and state legislation.

The Institute occupies a unique position as a reporting entity. As a not-for-profit membership organisation, it does not have the same level of structural complexity as listed companies. However, in line with its vision to lead the profession, the Institute has adopted rigorous systems of control and accountability as the basis of the administration of corporate governance.

These systems are clearly outlined in the Institute's supplemental Royal Charter, by-laws, governance manual and code of conduct, which are available at charteredaccountants.com.au

A solid foundation for management oversight

Board of directors

The Institute's Board comprises entirely non-executive directors. Non-executive directors or past presidents chair all four committees of the Board.

The Board and its committees operate in accordance with Charters, which are reviewed annually to ensure alignment with the Institute's strategic objectives.

The Board meets at least seven times a year for scheduled meetings, and has the facility to meet without the CEO if required. The Board is committed to holding at least two of these meetings interstate, with the balance held at the Institute's head office in Sydney. A register of disclosures for each director is tabled at every Board meeting.

Every three years, the Board and management establish a three-year strategic plan and corporate strategy, and each year a detailed annual business plan is established to set the priorities, direction and performance targets for the organisation.

Day-to-day management of the organisation's affairs and implementation of corporate strategy and policy initiatives are the responsibility of the CEO and management.

Chief executive officer

The CEO's responsibilities include advising the Board on strategic direction, ensuring business activities are in alignment with the Institute's strategic plan, ensuring the

organisation conducts its affairs within the law, and keeping the Board informed of all major business proposals and developments through regular reports.

Board composition

The Board comprises seven members, who are elected by Chartered Accountants on regional registers. Up to four additional members can be Board-appointed. Directors serve a maximum of two terms of three years each. Each year the Board elects a president and deputy president.

All directors must comply with the Board's code of conduct and accompanying guidelines. This code covers issues such as the requirement to act in good faith, duties of due care and diligence, conflict of interest, issues of improper use of power and information, independence, confidentiality and the obligation to uphold the law.

Board meeting attendance is shown on page 31.

Board committees

There are four committees of the Board: Audit and Risk, Governance, Nominations, and Executive Review (for attendance of meetings see page 31). Membership of these committees comprises directors, the CEO and past presidents. There are a further four advisory committees – Corporate, Public Practice, Regional Australia, and the Education Board – along with six regional councils and five overseas member groups. These committees report to the Board and meet regularly throughout the year (see pages 35 – 36).

Indemnification and insurance for directors and officers

The Institute's by-laws provide for an indemnity to each person who is or has been a director, councillor or committee member or officer against any liability which results from any act or deed done in the discharge of the individual's duties.

The Institute's insurance policy serves to indemnify the directors, councillors, committee members and officers against liabilities for costs and expenses incurred by them in defending legal proceedings arising out of the performance of their normal duties for the Institute.

Adding value through board structure and ethical and responsible decision-making.

The Board and its committees provide visionary leadership to the organisation and its global operations to ensure that the Institute sets and achieves strategic objectives and operates effectively and efficiently. Under the Institute's by-laws, the Board is given power over:

- > Maintaining and controlling the Institute's affairs
- > The appointment, removal and remuneration of the CEO

- > The promotion of improvements in laws affecting the accounting profession
- > The promulgation of regulations, including regulations prescribing rulings
- > Providing guidance on standards of practice and professional conduct, including technical standards.

The Board governs the Institute by:

- > Setting strategic direction
- > Approving and monitoring delivery of the strategic plan
- > Liaising with stakeholders
- > Ensuring compliance with statutory obligations
- > Managing risk
- > Monitoring organisational performance
- > Monitoring the financial position.

This Board structure comprises both member-elected and Board-elected directors. This balance ensures the Board comprises directors with appropriate skills, experience and attributes for the organisation and its business. The directors' skills and expertise relevant to their position and their terms of office are described on pages 28 – 30.

Governance Committee

The Governance Committee assists the Board with the oversight of matters relating to the Royal Charter and by-laws and general corporate governance. The review of existing policy initiatives and the development of new policy initiatives and related issues, plus ethical guidelines and professional conduct for the Board and Board committees, are also the responsibility of this committee.

Nominations Committee

The Institute has a separate Nominations Committee. It assists the Board in identifying potential candidates for appointment and removal as members of committees and other appointments. While the Nominations Committee is not able to formally make appointments to the Board, it can identify skills gaps and work with the Board to address these gaps. The members of this committee are listed on page 35.

Ethical and responsible decision-making

Members and staff are required to meet high standards of honesty and integrity, as outlined in the Institute's code of conduct. New employees are provided with a comprehensive information kit and induction program which outline standards of behaviour expected of all employees. All staff also participate in the Institute's two-day cultural program, PRIDE, and staff performance reviews; the development process includes behavioural expectations in alignment with PRIDE values (see page 10).

Risk management and audit

Audit and Risk Committee

The Audit and Risk Committee comprises three Board members. In accordance with its Charter, the committee assists the Board in discharging its responsibility for financial reports, application of accounting policies, internal control systems and the operation of enterprise risk management processes.

External auditors

Ernst & Young is the Institute's external auditor. The external auditor's performance is reviewed annually.

An analysis of fees paid to the external auditors, including a breakdown of any non-audit fees, is provided in Note 16 of the financial report. It is the policy of the external auditors to provide an annual declaration of independence to the Audit and Risk Committee (see page 35). All proposed non-audit work by the external auditor is required to be approved by the Audit and Risk Committee prior to being undertaken.

The Audit and Risk Committee undertakes a full review of the audit engagement before deciding to reappoint the existing audit firm or seek tenders on the open market.

Auditor independence and non-audit services

The directors received a declaration from the auditor of the Institute, as printed on page 34.

Non-audit services

The non-audit services provided by the auditor, Sean Van Gorp, or his firm, Ernst & Young, are set out in Note 16, Auditors' Remuneration. The directors are satisfied that the provision of non-audit services is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*. The nature and scope of each type of non-audit service provided means that auditor independence was not compromised.

Risk management

The Institute's Executive Business Risk Management Committee is charged with identifying, assessing, monitoring and managing risk and compliance across the organisation. The committee reports to the Audit and Risk Committee on an ongoing basis.

The Institute's approach to risk management is an integral part of the management processes and culture and underpins the success of business activities.

The Executive Business Risk Management Committee implements the framework to identify, assess, monitor and manage risk and compliance across the organisation. The committee is made up of the CEO, Deputy CEO and executive management team.

Financial reporting

The Board presents to members a report, signed by the president and deputy president, that the financial statements of the Institute for the full financial year give a true and fair view of the organisation's financial position and operational results, and comply with accounting standards in Australia.

Respecting the rights of members, and timely and balanced disclosure

Enhanced performance

The Board completes a formal evaluation process annually. The results are provided to the governance and nominations committees for review and consideration, with a recommendation being provided to the Board.

Fair and responsible remuneration

The Board has an Executive Remuneration Review Committee that monitors the terms and conditions of employment of staff and staff remuneration. The committee considers

the remuneration of the chief executive officer and senior management, agrees the remuneration strategy and structure, and approves the annual remuneration budget. The five highest-paid executives (non-directors) are paid within the salary range of A\$225,000 to A\$491,000.

No director of the Institute has, since the end of the previous financial year, received or become entitled to receive a benefit (other than a benefit included in the total amount of emoluments disclosed in Note 21, director and executive disclosures, in the Notes to the Financial Statements) by reason of a contract made by the Institute with a director or with a firm of which the director is a member, or with any entity in which the director has a substantial financial interest except as set out in Notes 20 and 21, related parties, in the Notes to the Financial Statements.

Recognise the legitimate interest of stakeholders

Directors are considered to be independent insofar as membership does not imply or constitute a relationship that would lead to material interference with their ability to act objectively and in the best interests of the Institute.

Directors whose firms undertake work for the Institute do not participate in negotiations or discussions around such work at Institute Board meetings, and abstain from any decisions that relate to their organisation. No director or their organisation is a material supplier to the Institute, although their organisations may be substantial customers.

Declaration of independence by the Institute's auditor

Sean Van Gorp FCA
C/- Level 49, 680 George Street
Sydney NSW 2000

Auditor's independence declaration to the directors of the Institute of Chartered Accountants in Australia

In relation to my audit of the financial report of the Institute of Chartered Accountants in Australia for the year ended 30 June 2009, to the best of my knowledge and belief, there has been no contravention of the auditor independence requirements of any applicable code of professional conduct.

Financial commentary

For the year ended 30 June 2009

Principal activities

This year, the principal activities of the Institute were providing education and training to members, potential members and the broader business community, and providing member services. There were no significant changes in the nature of activities of the Institute during the year.

Financial results and review of operations

The Institute achieved a surplus of \$4.8m for the year (2008: \$1.8m). Revenue rose by 5.3% to \$79.5m. Expenditure increased by 1.4%, which was lower than originally anticipated. In response to the global economic downturn, the Institute undertook a review of its organisational structure. This review resulted in a more streamlined structure shifting from nine divisions to six. This, together with management's strong focus on cost efficiency, resulted in a lower increase in expenditure.

Revenue and expenditure

The major movements in revenue were as follows:

- > Growth in membership revenue was primarily due to increased member numbers of 5.7% combined with an increase in subscription rates of 4.5%, which produced \$3.1m of increased revenue from membership fees and related activities
- > There was growth in the Chartered Accountants Program revenue of \$0.8m. The Program recorded an 18.9% increase in initial student enrolments, and Module fees increased by 4.0%
- > Overall, Training & Development revenue increased by 1.4%. Two new activities were commenced during the year: Live Online Training (August) and the Candidate Development Program (September). In addition, there was an increase in revenue generated from customised in-house training solutions. Public training courses reflected a decrease in revenue of 5.3% as signs of the worsening economic climate began to take effect
- > Other revenue decreased by 12.7%, primarily due to decreased sponsorship revenue and *Charter* magazine advertising revenue, in line with the deteriorating economic climate.

Funds were channelled into a number of activities affecting expenditure as follows:

- > Service expenses decreased, primarily as a result of streamlining the Chartered Accountants Program and Training & Development delivery costs, which included increased use of internal facilities
- > Occupancy expenses increased, primarily due to rent increases and an increase in depreciation expense due to the additional fit-out and furniture in Erskine Street, Sydney
- > Marketing expenditure increased, primarily due to the 'spirit of being number one' advertising campaign
- > Administration expenses increased by 3.9%, primarily due to a 3.3% increase in payroll and related staff expenses. Expenses also increased due to careers marketing activities, including the Student Challenge to promote the Chartered Accountants brand
- > Other expenses decreased, primarily due to lower consultant fees in line with management's ongoing focus on cost efficiency. Furthermore, interest paid reduced by 94.7% as a result of the Institute's lower borrowing requirements this year.

Capital expenditure

Capital expenditure decreased by \$5.1m from the prior year. The major costs incurred during the year were for additional fit-out and renovation costs at our Erskine Street premises and regional offices of \$0.5m.

Other capital expenditure included the continued rollout and improvement of IT infrastructure of \$0.4m. The Institute has deployed two storage area networks and expanded its virtualised environment. This will enable the establishment of a fully functional disaster recovery site during the next financial year and will provide capacity for the initial stage of the Institute's applications upgrade.

Cash flow and liquidity

At balance date, the Institute had cash of \$15.1m due to the receipt of membership subscriptions in June. The Institute was in overdraft from April to early June 2009. The increase in the cash position at balance date reflects the \$25.6m membership subscriptions received in advance, an increase of 24.5% from the prior year, and the streamlining of expenses during the year. Borrowings were required to fund the 2007 acquisition of the Sydney premises (Erskine Street). These borrowings are expected to be required again in 2010 and 2011, but at a reduced level, to fund the computer systems upgrade.

Income statement

For the year ended 30 June 2009

Notes	2009 \$'000	2008 \$'000
Revenue from operating activities	77,709	73,985
Revenue from non-operating activities	1,835	1,538
Total revenue from ordinary activities	79,544	75,523
Service expenses	(16,964)	(17,859)
Marketing, promotion and publication expenses	(3,546)	(2,998)
Occupancy expenses	(5,293)	(4,657)
Administration expenses	(40,356)	(38,858)
Other expenses	(8,564)	(9,327)
Total expenses from ordinary activities	(74,723)	(73,699)
Surplus from ordinary activities	4,821	1,824

The above income statement should be read in conjunction with the accompanying notes.

Balance sheet

As at 30 June 2009

	Notes	2009 \$'000	2008 \$'000
Current assets			
Cash and cash equivalents	6	15,146	4,475
Trade and other receivables	7	4,739	5,742
Total current assets		19,885	10,217
Non-current assets			
Receivables	7	350	350
Property, plant and equipment	8	58,877	60,682
Intangible assets	9	301	153
Total non-current assets		59,528	61,185
Total assets		79,413	71,402
Current liabilities			
Receipts in advance	10	33,296	26,515

Cash flows from investing activities		
	20	14,040
	(1,195)	(6,219)
	224	205
	(951)	8,026
Cash flows from financing activities		
	5,409	14,000
	(5,409)	(24,000)
	(22)	(411)
	(22)	(10,411)
	10,671	4,502
	4,475	(27)
6	15,146	4,475

The above cash flow statement should be read in conjunction with the accompanying notes.

Notes to the financial statements

For the year ended 30 June 2009

1. Corporate information

The Institute of Chartered Accountants in Australia ('the Institute') is a body corporate that is governed by its Supplemental Royal Charter and is incorporated and domiciled in Australia. The liability of its members is limited.

The registered office of the Institute is:
33 Erskine Street
Sydney NSW 2000

The principal activities of the Institute during the year were:

- > The delivery of pre- and post-admission education and services
- > The setting and maintaining of high standards as they apply to members to enhance their standing with the public and the business community
- > The continuing development of government relations and advocacy programs in pursuit of legislative and regulatory objectives
- > The continuing development of a program to enhance the market and personal value of the Chartered Accountant designation.

2. Summary of significant accounting policies

(a) Basis of preparation

This general purpose financial report has been prepared in accordance with Australian Accounting Standards, other authoritative pronouncements of the Australian Accounting Standards Board, and Urgent Issues Group Consensus Views.

This financial report has been prepared on the basis of historical cost, except for freehold property which has been measured at fair value (refer Note 2(e)).

The financial report is presented in Australian dollars and all values are rounded to the nearest thousand dollars (\$'000) unless otherwise stated.

(b) Statement of compliance

The financial report complies with Australian Accounting Standards.

The Institute has early adopted AASB 8 *Operating Segments*. As the Institute is not a listed entity, the Institute has not included a note on an operating segment.

Adoption of new accounting standards

Certain Australian Accounting Standards and AASB interpretations have recently been issued or amended but are not yet effective and have not been adopted by the Institute for the annual reporting period ended 30 June 2009. The interpretations as relevant to the Institute are as follows:

- > AASB 101 (Revised) and AASB 2007-8 *Presentation of Financial Statements* and consequential amendments to other Australian Accounting Standards – this introduces a statement of comprehensive income and other revisions on the presentation of items in the statement of changes in equity, new presentation requirements for restatements or reclassifications of items in the financial statements, changes in the presentation requirements for dividends, and changes to the titles of the financial statements.

These amendments are only expected to affect the presentation of the Institute's financial report and will not have a direct impact on the measurement and recognition of amounts disclosed in the financial report. This standard is for annual reporting periods beginning on or after 1 January 2009. The Institute has not determined at this stage whether to present a single statement of comprehensive income or two separate statements.

(c) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet, which comprise cash at bank and in hand and short-term deposits, are stated at their nominal amount.

For the purposes of the Cash Flow Statement, cash and cash equivalents consist of cash and cash equivalents as defined above and include deposits at call which are readily convertible to cash in hand and subject to an insignificant risk of changes in value, net of outstanding bank overdrafts.

(d) Trade and other receivables

Trade receivables are recognised and carried at original invoice amount less an allowance for impairment.

Collectability of trade receivables is reviewed on an ongoing basis. An impairment provision is recognised when there is objective evidence that the Institute will not be able to collect the receivable. Individual debts which are known to be uncollectible are written off when identified.

Notes to the financial statements continued

For the year ended 30 June 2009

(e) Property, plant and equipment

Freehold property is measured at fair value less accumulated depreciation on buildings and building plant less any impairment losses recognised after the date of revaluation.

All plant and equipment is stated at historical cost less accumulated depreciation or amortisation and any accumulated impairment losses.

Depreciation of property, plant and equipment, other than land, is calculated on a straight-line basis at rates which take account of the remaining useful life of the relevant assets and their estimated residual values.

The cost of fixtures and fittings on leasehold premises is amortised over their estimated useful lives or the remainder of the lease period, dependent on whichever period is shorter.

Major depreciation periods are:

Freehold property:	
Building	50 years
Building plant	25 years
Furniture	10 years
Office equipment	5 years
Computer equipment	3 years
Fixtures and fittings on freehold premises	10 years
Fixtures and fittings on leasehold premises	Lease term
Motor vehicles	3 years

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted if appropriate, at each financial year end.

(i) Impairment

The carrying values of plant and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised as expenditure in the Income Statement. Freehold property is measured at revalued amounts, and therefore impairment losses on freehold property are treated as a revaluation decrement.

(ii) Revaluations

Following initial recognition at cost, freehold property is carried at a revalued amount which is the fair value at the date of revaluation less any subsequent accumulated depreciation on buildings and any subsequent accumulated impairment losses.

Any revaluation increment is credited to the property revaluation reserve included in the members' funds section of the Balance Sheet, except to the extent that it reverses a revaluation decrement for the same asset previously recognised in profit or loss, in which case the increase is recognised in profit or loss.

Any revaluation decrement is recognised in profit or loss, except to the extent that it offsets a previous revaluation increment for the same asset, in which case the decrement is debited directly to the property revaluation reserve to the extent of the credit balance existing in the revaluation reserve for that asset.

(iii) Derecognition and disposal

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal.

Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Income Statement in the year the asset is derecognised.

(f) Intangibles

Intangible assets acquired are initially measured at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life is reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, which is a change in accounting estimate. The amortisation expense on intangible assets with finite lives is recognised in profit or loss in the expense category consistent with the function of the intangible asset.

Intangibles are amortised as follows:

Computer software	3 years
-------------------	---------

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognised in profit or loss when the asset is derecognised.

(g) Receipts in advance

Receipts in advance are carried at original invoice amount in respect of goods and services to be provided subsequent to balance date. Receipts in advance includes membership fees, Chartered Accountants Program enrolment fees, and Training & Development course fees.

(h) Trade and other payables

Trade and other payables are carried at amortised cost. They represent liabilities for goods and services provided to the Institute prior to the end of the financial year that are unpaid and arise when the Institute becomes obliged to make future payments in respect of the purchase of these goods and services. Trade payables are non-interest bearing and are normally settled on a 30-day term.

(i) Employee leave benefits

(i) Wages, salaries and annual leave

Liabilities for wages and salaries, including non-monetary benefits, and annual leave expected to be settled within 12 months of the reporting date, are recognised in other payables in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled.

(ii) Long service leave

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures, and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currencies that match, as closely as possible, the estimated future cash outflows.

(j) Revenue and expense recognition

Revenue and expenses are recognised to the extent that it is probable that their respective economic benefits will flow to or be lost or consumed by the Institute, and the revenue and expenses can be reliably measured. The following specific recognition criteria must also be met before revenue or expenses are recognised.

(i) Member fees

The Institute's membership subscription year is 1 July to 30 June. Fees are payable annually in advance. Only those member fee receipts which are attributable to the current financial year are recognised as revenue.

Fee receipts relating to periods beyond the current financial year are shown, excluding any applicable taxes, in the Balance Sheet as Receipts in advance under the heading of current liabilities.

(ii) Other revenue-generating activities

The Institute undertakes certain activities which are accounted for on a work-in-progress basis including Chartered Accountants Program modules, Training & Development courses, Quality Reviews, Charter Journals, Congresses, and student activities. The Institute's policy of accrual accounting with respect to the recognition of revenue and expenses on such activities is as follows:

- > For activities which are completed on or before balance date, any surplus or deficit is incorporated into the year's results
- > For activities which take place wholly after the end of the financial year, any revenue received and expense incurred on such activities prior to balance date is deferred and carried forward in the Balance Sheet within receipts in advance and prepayments respectively
- > For activities which span the balance date, a proportion of the final projected net surplus is recognised in the financial year on the percentage of completion basis.

Revenue in regard to certain activities is deferred in cases where it is anticipated that refunds will be made in regard to discontinuation by attendees. The deferred amount is carried forward in the Balance Sheet within receipts in advance.

For activities which span the balance date, the methods adopted to determine the percentage of completion basis are as follows:

- > For Chartered Accountants Program modules, the percentage of completion is apportioned according to the time span between the commencement of the module and the completion of the examination
- > For other courses and activities that are delivered in a series of events, the percentage of completion is apportioned according to the number of events delivered at balance date compared to the total number of events in the series.

(iii) Sale of goods

The Institute recognises revenue from the sale of goods when physical control of the goods passes to the purchaser pursuant to an enforceable sales contract and the costs incurred or to be incurred in respect of the transaction can be measured reliably. Risks and rewards of ownership are considered passed to the buyer at the time of delivery of the goods to the customer.

Notes to the financial statements continued

For the year ended 30 June 2009

(iv) Interest income and expense

Interest income on bank bills and deposits is recognised on an accrual basis (using the effective interest method, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the investment) where the Institute attains control of a right to receive consideration for an investment.

Interest expense on borrowings is recognised on an accrual basis.

(v) Member groups

The Institute grants funds to certain intrastate and overseas member groups. These funds are paid to support and supplement membership activities controlled by members in those locations and are expensed by the Institute at the time of the payment to the groups.

(k) Income tax and other taxes

(i) Income tax

The Institute prepares its income tax returns by reference to the application of the principle of mutuality to the revenue and expenses of the Institute. The principle of mutuality is a common law principle arising from the premise that individuals cannot profit from themselves. Accordingly, receipts from members are deemed to be mutual income and not subject to income tax, and expenses in connection with mutual activities are therefore not deductible for taxation purposes. All other receipts and payments are classified in accordance with taxation legislation.

The Institute is liable for other taxes including fringe benefits tax.

Deferred income tax assets are recognised for all deductible temporary differences, carry forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised, except when the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor the taxable profit or loss.

The carrying amount of deferred income tax assets is reviewed at each balance date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Unrecognised deferred income tax assets are reassessed at each balance date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets are measured at the tax rates that are expected to apply to the year when the asset is realised, based on tax rates (and tax laws) that have been enacted or substantively enacted at balance date.

Where assets are revalued, no provision for potential capital gains tax has been made because of the long-term nature of the asset and the existence of accumulated tax losses.

(ii) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST except:

- > Where the GST incurred on a purchase of goods or services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable
- > Receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Balance Sheet.

In respect of all receipts in advance that are subject to GST, a liability for GST payable is raised except for receipts in advance that have a settlement date in respect of the GST liability that occurs prior to balance date at which stage the liability will have already been settled.

Cash flows are included in the Cash Flow Statement on a gross basis, and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority, is classified as part of operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

(l) Operating leases

Operating lease payments are recognised as an expense in the Income Statement on a straight-line basis over the lease term. Lease incentives are recognised in the Income Statement as an integral part of the total lease expense.

(m) Government grants

Government grants are recognised at fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with.

When the grant relates to an expense item, it is recognised as income over the periods necessary to match the grant on a systematic basis to the costs that it is intended to compensate.

(n) Provisions

Provisions are recognised when there is a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a borrowing cost.

(o) Borrowing costs

Borrowing costs are recognised as an expense when incurred.

(p) Impairment of assets other than goodwill

The carrying values of the Institute's assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

For an asset that does not generate largely independent cash inflow, the recoverable amount is determined for the cash generating unit to which the asset belongs.

If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amount.

The recoverable amount of the asset is the greater of fair value less costs to sell and value in use.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years.

An impairment loss and/or reversal is recognised in the Income Statement immediately.

(q) Significant accounting judgments, estimates and assumptions

In applying the Institute's accounting policies, management continually evaluates judgments, estimates and assumptions based on experience and other factors, including expectations of future events that may have an impact on the Institute.

All judgments, estimates and assumptions made are believed to be reasonable based on the most current set of circumstances available to management. Actual results may differ under different conditions from the judgments, estimates and assumptions. Significant judgments, estimates and assumptions made by management in the preparation of these financial statements are outlined below.

(i) Significant accounting judgments

Non-recovery of deferred tax assets

Deferred tax assets are not recognised for deductible temporary differences as management considers that it is not probable that future taxable profits will be available to utilise those temporary differences.

Impairment of non-financial assets

The Institute assesses impairment of all assets at each reporting date by evaluating conditions specific to the Institute and to the particular asset that may lead to impairment. These include the asset's use and performance, future expectations, economic and political environments and the assessment of the asset's carrying value. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves value-in-use calculations, which incorporate a number of key estimates and assumptions.

(ii) Significant accounting estimates and assumptions

Long service leave provision

As disclosed in Note 2(i)(ii), the liability for long service leave is recognised and measured at the present value of the estimated future cash flows to be made in respect of all employees at balance date. In determining the present value of the liability, attrition rates, pay increases through promotion, and inflation have been taken into account.

Allowance for impairment loss on trade receivables

Where receivables are outstanding beyond the normal trading terms, the likelihood of the recovery of these receivables is assessed by management on an individual account basis. The impairment loss is outlined in Note 7.

Estimation of useful lives of assets

The estimation of the useful lives of assets has been based on historical experience as well as future expectations on use, lease terms (for leased equipment), and turnover policies (for motor vehicles). In addition, the condition of the assets is assessed at least annually and considered against their remaining useful life. Adjustments to useful lives are made when considered necessary. Depreciation and/or amortisation charges are included in Note 8.

Notes to the financial statements continued

For the year ended 30 June 2009

3. Financial risk management objectives and policies

The Institute's principal financial instruments are comprised of cash, receivables and bank loans.

The Institute manages its exposure to key financial risks in accordance with the Institute's financial risk management policy. The objective of the policy is to support the delivery of the Institute's financial targets while protecting future financial security.

The main risks arising from the Institute's financial instruments are:

- > Interest rate risk
- > Credit risk
- > Liquidity risk.

The Institute uses different methods to measure and manage the risks to which it is exposed. These include:

- > Monitoring levels of exposure to interest rates
- > Monitoring assessments of market forecasts for interest rates
- > Ageing analysis and monitoring of specific credit balances to manage credit risk
- > Liquidity risk monitoring through the development of future rolling cash flow forecasts.

The Board reviews and agrees on policies for managing each of these risks. The policies are summarised below.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The main component of market risk to the Institute is interest rate risk.

Interest rate risk refers to the risk that movements in variable interest rates will affect financial performance by increasing interest expenses or reducing interest income.

Interest rate risk arises from financial assets and liabilities that are subject to floating interest rates. The Institute's exposure to market interest rates relates primarily to:

- > Cash and cash equivalents
- > Bank overdraft
- > Borrowings.

Currently the Institute has an approved overdraft facility with a financial institution with a limit of \$19,000,000. The interest rate is based on the 30-day bank bill swap rate plus a margin.

The Institute collects subscription income at the beginning of the financial year. It is anticipated that the overdraft facility would be utilised from May 2010 to June 2010. Borrowings are expected to peak at approximately \$2,200,000 in May 2010. In order to minimise interest costs during the period that the Institute has surplus cash, the Institute has chosen not to fix any component of its borrowings. This is consistent with previous years, and enables the Institute to minimise borrowing costs and maximise the impact of positive cash flows in the first half of the financial year.

All of the Institute's revenues are denominated in its functional currency, namely expressed in Australian dollars.

In addition, the Institute has an insignificant exposure to foreign currency purchases. These are mainly comprised of overseas travel and accommodation charges which are generally settled through credit card transactions at the time of incurrence, contributions to IFAC, contributions to overseas member groups, and software licensing.

Consequently, the Institute is not exposed to any significant fluctuations in foreign currencies.

	Principal subject to floating interest rate \$'000	Principal subject to fixed interest rate \$'000	Non- interest bearing \$'000	Total \$'000	Average interest rate Floating	Average interest rate Fixed
--	--	---	---------------------------------------	-----------------	--------------------------------------	-----------------------------------

3. Financial risk management objectives and policies (continued)

2009

Financial assets						
Cash and cash equivalents	–	15,146	–	15,146	–	3.54%

Total financial liabilities	–	–	(9,650)	(9,650)		

Sensitivity analysis

The following sensitivity is based on interest rate risk exposures in existence at balance date.

A sensitivity of 50 basis points shift has been selected as this is considered reasonable given the current level of short-term Australian dollar interest rates.

At 30 June 2009, if interest rates had moved, as illustrated in the table below, with all other variables held constant, post-tax surplus and members' funds would have been affected as follows:

	Post tax surplus increase/(decrease)		Members' funds increase/(decrease)	
	2009 \$'000	2008 \$'000	2009 \$'000	2008 \$'000
If there was 50 basis points higher in interest rates with all other variables held constant	76	22	76	22
If there was 50 basis points lower in interest rates with all other variables held constant	(76)	(22)	(76)	(22)

Notes to the Financial Statements continued

For the year ending 30 June 2009

3. Financial risk management objectives and policies (continued)

Credit risk

Credit risk refers to the loss that the Institute would incur if a debtor or other counterparty defaults under its contractual obligations.

Credit risk would arise from the financial assets of the Institute, which comprise trade and other receivables. The Institute's exposure to credit risk is limited as there is a significant amount of low value individual debtors located in multiple geographical areas. Receivable balances are monitored on a regular basis with the result that the Institute's exposure to bad debts is not significant.

Management believes that the Institute does not have a concentration of credit risk. The Institute's maximum exposure to credit risk is equal to the carrying value of the receivables held.

Liquidity risk

Liquidity risk includes the risk that, as a result of the Institute's operational liquidity requirements:

- > The Institute will not have sufficient funds to settle a transaction on the due date
- > The Institute will be forced to sell financial assets at a value which is less than what they are worth or
- > The Institute may be unable to settle or recover a financial asset at all.

To help reduce these risks, the Institute has:

- > A liquidity policy which targets a minimum and average level of cash and cash equivalents to be maintained
- > Readily accessible standby facilities and other funding arrangements in place.

The Institute receives a substantial part of its cash inflows at the beginning of the financial year and manages its expenditure within these cash inflows and approved funding arrangements.

The following table details the Institute's remaining contractual maturity for its financial liabilities. The table has been prepared based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Institute can be required to pay.

	Less than 6 months \$'000	6 to 12 months \$'000	1 to 5 years \$'000	Total \$'000
2009				
Financial liabilities				
Trade and other payables	(4,887)	–	(429)	(5,316)
	(4,887)	–	(429)	(5,316)
2008				
Financial liabilities				
Trade and other payables	(9,309)	–	(341)	(9,650)
	(9,309)	–	(341)	(9,650)

	2009 \$'000	2008 \$'000
4. Revenue and expenses		
(a) Revenue		
Revenue from operating activities:		
Subscriptions and related revenue	37,748	34,683
Revenue from education and other services	39,961	39,302
Total revenue from operating activities	77,709	73,985
Revenue from non-operating activities:		
Rent	1,117	1,087
Royalties	494	246
Interest from other persons	224	205
Total revenue from non-operating activities	1,835	1,538
Total revenue	79,544	75,523
(b) Expenses included in the Income Statement		
Depreciation and amortisation of non-current assets		
Freehold property	783	820
Furniture and equipment	750	229
Computer equipment	777	554
Fixtures and fittings on freehold premises	604	928
Fixtures and fittings on leasehold premises	307	231
Motor vehicles	6	31
Depreciation of property, plant and equipment	3,227	2,793
Computer software	94	82
Depreciation and amortisation of non-current assets	3,321	2,875
Operating lease expense on premises	1,722	1,474
Employee benefits expense		
Wages and salaries	28,665	26,475
Superannuation	2,176	2,196
	30,841	28,671
Other expenses		
Bad debts written off	16	11
Finance costs		
Bank loans and overdraft	22	411

Notes to the financial statements continued

For the year ended 30 June 2009

	2009 \$'000	2008 \$'000
5. Income tax		
(a) Income tax expense		
The major components of income tax are:		
Current income tax	1,391	826
Adjustments in respect of current income tax of previous years	615	–
Benefit arising from previously unrecognised tax losses of prior periods used to reduce current income tax expense	(2,006)	(826)
(b) Numerical reconciliation between tax expense recognised in the income statement and prima facie income tax		
Surplus from ordinary activities	4,821	1,824
Prima facie tax expense at the rate of 30% (2008: 30%)	1,446	547
Adjustments in respect of current income tax of previous years	615	–
Entertainment	55	32
Depreciation of plant and equipment, and intangibles	996	863
Mutual activities	(1,106)	(616)
Benefit arising from previously unrecognised tax losses of prior periods used to reduce current income tax expense	(2,006)	(826)
Aggregate income tax expense	–	–

At balance date, accumulated revenue tax losses of \$13,920,000 (2008: \$15,926,000) existed, giving rise to a potential future tax benefit. The potential deferred tax asset attributable to the revenue tax profit is not recognised, as realisation is not probable. The deferred tax asset for revenue tax losses, which will offset future non-mutual income, will only be utilised if:

- > Future assessable income is derived of a nature and of an amount sufficient to enable the benefit to be realised
- > The conditions for deductibility imposed by tax legislation continue to be complied with
- > No changes in tax legislation adversely affect the Institute in realising the benefit.

Deferred tax assets not recognised in respect of deductible temporary differences amount to \$908,000 (2008: \$235,000).

	2009 \$'000	2008 \$'000
6. Cash and cash equivalents		
Cash at bank and on hand	6,646	4,475
Short-term deposits	8,500	–
	15,146	4,475

Cash and cash equivalents comprise cash on hand and cash at bank which is at call and which earned interest at floating rates and short-term deposits which earned interest at fixed rates.

The Institute has entered into an approved overdraft facility with a financial institution with a limit of \$19,000,000 and secured by a registered mortgage over the property situated at 33 Erskine Street, Sydney, NSW. The effective interest rate is based upon the 30-day bank bill swap rate plus a margin.

At 30 June 2009, the Institute had available \$19,000,000 (2008: \$25,000,000) of undrawn committed borrowing facilities.

Reconciliation to Cash Flow Statement

For the purposes of the Cash Flow Statement, cash and cash equivalents comprise the following at the end of the financial year:

Cash and cash equivalents (per Balance Sheet)	15,146	4,475
Cash and cash equivalents (per Cash Flow Statement)	15,146	4,475

Reconciliation of net surplus after tax to net cash flows from operations

Net surplus from ordinary activities	4,821	1,824
Adjustment:		
Depreciation and amortisation of property, plant and equipment	3,227	2,793
Net (gain)/loss on disposal of property, plant and equipment and intangibles	3	(13)
Amortisation of intangible assets	94	82
Bad debt expense	(86)	65
Interest received	(224)	(205)
Interest paid	22	411
	3,036	3,133
Changes in working capital:		
Decrease/(increase) in receivables	1,089	(1,940)
Increase/(decrease) in payables	(4,334)	116
Increase/(decrease) in provisions	251	(84)
Increase in receipts in advance	6,781	3,838
	3,787	1,930
Net cash flows from operating activities	11,644	6,887

Notes to the financial statements continued

For the year ended 30 June 2009

	2009 \$'000	2008 \$'000
7. Trade and other receivables		
Current		
Trade receivables (a)	2,383	3,480
Allowance for impairment loss	(173)	(259)
	2,210	3,221
Non-trade receivables (b)		
Other receivables	1,163	1,342
Prepayments	1,366	1,179
Total trade and other receivables	4,739	5,742
Non-current		
Non-trade receivables (c)		
Loan	350	350

- (a) Trade receivables are non-interest bearing and are generally on 30-day terms. A provision for impairment loss has been made for estimated irrecoverable trade receivables determined by assessment made by management when there is objective evidence that an individual trade receivable is impaired. An impairment writeback of \$70,000 (2008: impairment loss \$76,000) has been recognised by the Institute in the current year. These amounts have been included in the other expenses line item in the Income Statement.

Included in the Institute's trade receivables are debtors with a carrying amount of \$738,000 (2008: 1,378,000) which are past due at the reporting date but not considered impaired as there has not been a significant change in credit quality and the Institute believes that the amounts are still considered recoverable. The Institute does not hold any collateral over these balances.

All other balances within trade and other receivables do not contain impaired assets and are not past due. Based on the credit quality of these other receivables, it is expected that those amounts will be received when due.

The Institute has no receivables with renegotiated credit terms that would have been past due under the original terms and conditions.

- (b) Current non-trade receivables are generally non-interest bearing and are normally payable at call. There are no non-trade receivables that are past due at the reporting date.
- (c) The Institute, in conjunction with CPA Australia and the National Institute of Accountants, has lent funds to the Association of Accounting Technicians (AAT) as agreed under a Memorandum of Understanding. The non-current loan to AAT is \$350,000 before interest which is charged monthly based on the 90-day bank bill rate plus 0.5%.

	2009 \$'000	2008 \$'000
7. Trade and other receivables (continued)		
At 30 June, the aging analysis of trade debtors is as follows:		
Neither past due nor impaired	1,472	1,843
Past due but not impaired:		
31 – 60 days	473	1,107
61 – 90 days	249	101
> 90 days	16	170
	738	1,378
Past due and impaired:		
31 – 60 days	70	111
61 – 90 days	4	90
> 90 days	99	58
	173	259
Total	2,383	3,480
Movements in the provision for impairment loss were as follows:		
At 1 July	259	194
Net (writeback)/charge for the year	(70)	76
Amounts written off	(16)	(11)
At 30 June	173	259

Notes to the financial statements continued

For the year ended 30 June 2009

	2009 \$'000	2008 \$'000

Balance at beginning of year	245	356
Arising during year	–	31
Utilised during the year	–	(159)
Discount rate adjustment	18	17
	263	245

In accordance with the lease agreements with various third parties, the Institute must restore leased premises in various locations to their original condition before the cessation of their respective lease terms.

Because of the long-term nature of the liability, the greatest uncertainty in estimating the make good provision is the costs that will ultimately be incurred. The provision has been calculated using a discount rate of 7.5%.

13. Reserves and retained earnings

Nature and purpose of reserves

The property revaluation reserve is used to record increments and decrements in the value of the property. The reserve is not distributable to members under the terms of the Supplemental Royal Charter of the Institute.

Movements in reserves:

Property revaluation reserve

Balance at beginning of the financial year	2,704	–
Increment on revaluation of property (refer Note 8)	492	2,704
Balance at end of the financial year	3,196	2,704

Movements in retained earnings:

Retained earnings

Balance at beginning of the financial year	30,464	28,640
Surplus from ordinary activities	4,821	1,824
Balance at end of the financial year	35,285	30,464

21. Director and executive disclosures (continued)		
(b) Compensation of key management personnel		
(i) Compensation policy		
Remuneration of the directors and senior management is determined by the Executive Review Committee, which also reviews remuneration levels for all staff. The Committee is appointed by the Board and consists of three members of the Board (currently the President, Deputy President, and the Chairman of the Governance Committee).		
(ii) Compensation of directors and executives for the year		
Compensation by category		
Short term	3,866	3,838
Other long-term leave payments	64	–
Terminations	207	–
	4,137	3,838

(iii) Loans to key management personnel

There are no loans between key management personnel and the Institute.

(iv) Other transactions of key management personnel and their personally related entities

There are no other transactions with key management personnel or their personally related entities.

22. Indemnification of directors and officers

The by-laws of the Institute indemnify the directors and officers, and provide that each director and officer:

- > Shall be indemnified against any losses or expenses that such a director or officer incurs or becomes liable to pay by reason of any act or deed done by the director or officer in the discharge of that director's or officer's duties except to the extent that such act or deed arises from the director's or officer's own wilful default
- > Shall not be liable for the acts of any person or for joining in any receipt or document or for any act of conformity or for any loss or expense happening to the Institute unless it arises from the director's or officer's own wilful default.

23. Members and members' liability

Total membership at 30 June 2009 is 51,473 (2008: 48,713).

In terms of the Institute's Charter and by-laws:

- > Members are not entitled to receive a dividend from the Institute
- > Members who cease to be members remain liable to the Institute for all monies which at the time of ceasing to be a member were due by that member to the Institute.

24. Events after balance date

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Institute, to affect significantly the operations of the Institute or the state of affairs of the Institute in future financial years.

Directors' declaration

The directors of the Institute of Chartered Accountants in Australia declare that the financial statements and notes set out on pages 39 to 65 which have been prepared as required under the by-laws of the Institute:

- (a) comply with Australian Accounting Standards and other mandatory professional reporting requirements
- (b) present fairly the financial position of the Institute as at 30 June 2009 and the results of its operations and its cash flows for the year ended on that date.

In the opinion of the directors, there are reasonable grounds to believe that the Institute will be able to pay its debts as and when they become due and payable.

Independent auditor's report to the members of the Institute of Chartered Accountants in Australia

I have audited the accompanying financial report of the Institute of Chartered Accountants in Australia (the Institute), which comprises the balance sheet as at 30 June 2009, and the income statement, statement of recognised income and expense and cash flow statement for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration.

Directors' Responsibility for the Financial Report

The directors of the Institute are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and in accordance with the By-laws of the Institute. This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances. In Note 2, the directors also state that the financial report, comprising the financial statements and notes, complies with Australian Accounting Standards.

Auditor's Responsibility

My responsibility is to express an opinion on the financial report based on my audit. I conducted my audit in accordance with Australian Auditing Standards. These Auditing Standards require that I comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on my judgment, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, I consider internal controls relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Independence

In conducting my audit I have met the independence requirements of the Australian professional accounting bodies. In addition to my audit of the financial report, I was engaged to undertake the services disclosed in the notes to the financial statements. The provision of these services has not impaired my independence.

Auditor's Opinion

In my opinion:

1. the financial report presents fairly, in all material respects, the financial position of the Institute of Chartered Accountants in Australia as of 30 June 2009, and of its financial performance and cash flows for the year then ended in accordance with Australian Accounting Standards; and
2. the financial report also complies with Australian Accounting Standards.

Sean Van Gorp FCA
